

Hepatitis C

Caring for Patients with Hepatitis C

At Prosperity Specialty Pharmacy, we help our Hepatitis C patients manage their disease and live active, fulfilling and productive lives.

There are many health challenges for patients with Hepatitis C (HCV), including proper nutrition, rest and exercise. Our pharmacy helps you simplify and manage your treatment. We take the worry and hassle out of your interferon drug therapy compliance through our Refill Reminder Program. A member of our pharmacy team contacts each patient, seven days before a refill is due, to arrange for convenient delivery of your medications.

By helping you stay on your medications and not miss a treatment, you have a better chance of achieving a sustained viral response (SVR) – the primary goal of your interferon therapy.

Injection Teaching and Support

Most patients with HCV take combination therapy for almost a full year (48 weeks). Therapy includes a weekly self-injection of the interferon medication.

Prosperity Specialty Pharmacy is the only specialty pharmacy in the area to offer individual injection teaching sessions and support services. We have private injection teaching rooms, where you can learn – at your own pace – how to prepare the materials and correctly administer your HCV medications.

Additional Services and Support

We offer convenient delivery of your medications, often at no extra cost. Same-day courier service is also available. We accept all major insurance plans, including Virginia, Maryland and Washington, DC Medicaid. Our Account Coordinators can help with any billing or reimbursement issues regarding your medication.

Please visit or call us if you have any questions or would like additional information about our pharmacy services.

We look forward to serving your specialty pharmacy needs.
