

Men's Health

Natural Treatment Options

Prosperity Specialty Pharmacy specializes in men's health, offering a range of compounded hormone replacement therapies for men, including treatment for erectile dysfunction and andropause, a male hormone imbalance typically affecting men between the ages of 40 and 55.

At Prosperity Specialty Pharmacy, your hormone therapy is individually compounded by one of our highly trained compounding pharmacists. That means you are getting the exact amount of hormones prescribed by your healthcare provider, to meet your individual needs.

Erectile Dysfunction

Many men may experience erectile dysfunction (ED), which can be caused by disease, illness, injury or as the result of side effects to medications. In these cases, oral medications commonly prescribed may not be effective in treating ED. Other treatment options may include penile injection therapy.

Trimix, a compounded medication, combines several commonly prescribed drug therapies that help to increase blood flow into the penis and produce an erection that should last 30 to 60 minutes.

Andropause

Similar to female menopause, andropause can affect men between the ages of 40 and 55. Andropause is a normal part of aging, and its symptoms can include a gradual and undesired decline in sexuality, mood, muscle mass and overall energy. It can also sometimes lead to more serious health risks.

Testosterone replacement for men with andropause can be a very effective treatment. Compounded hormone replacement therapy for men can be a safe, natural alternative that helps to restore the proper balance of male hormones.

Please visit or call us if you have any questions or would like additional information about our pharmacy and our compounding services.

We look forward to serving your specialty pharmacy needs.
