

Pediatric Medications

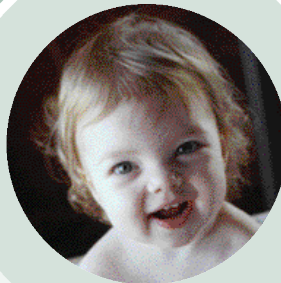

Infants and young children may have difficulties swallowing pills or taking certain medications because they don't like the taste. Also, many medications are not available in liquid form, which is often easiest for young children or elderly patients to swallow. At Prosperity Specialty Pharmacy, we can create medications in a form that is easiest for your child to take.

Our compounding pharmacists work closely with healthcare providers to create the most convenient and effective medications to meet the individual needs of our patients. We can compound your child's prescription in a variety of ways, including liquid, lollipops, creams, gels, lozenges, suppositories or nasal spray. We can also customize your child's medication in a wide variety of kid-friendly flavors!

Additional Services and Support

We offer convenient delivery of your medications, often at no extra cost. Same-day courier service is also available.

We accept all major insurance plans, including Virginia, Maryland and Washington, DC Medicaid. Our Account Coordinators can help with any billing or reimbursement issues regarding your medication.

Please visit or call us if you have any questions or would like additional information about our pharmacy and our compounding services.

We look forward to serving your specialty pharmacy needs.
