

Women's Health

Natural Treatment Options as a Woman Ages

Bio-identical hormone replacement therapy (bHRT) is often prescribed instead of synthetic medications to treat PMS, menopause, other hormone imbalances, and sexual dysfunction. bHRT is made from plants, including yams and soy, and matches the human hormones naturally found in a woman's body. bHRT actually replaces low or missing hormones without unwanted side effects.

At Prosperity Specialty Pharmacy, your bHRT therapy is individually compounded by one of our trained compounding pharmacists. That means that you are getting the exact hormones prescribed by your healthcare provider, to meet your individual needs.

Managing Menopause

For women experiencing menopausal symptoms – such as hot flashes, vaginal dryness and insomnia – synthetic or manufactured medications may only mask the symptoms and don't replace the hormones that are low or missing. These medications may also have unwanted side effects. Many women who prefer a more natural alternative, choose bHRT.

PMS Relief

Premenstrual Syndrome (PMS) can include physical, psychological and emotional symptoms related to a woman's menstrual cycle. Treatment options include medications to correct hormone imbalances, including compounded bHRT, lifestyle changes and nutritional supplements.

Fixing Hormone Imbalance

Symptoms of hormone imbalance typically increase as a woman ages. These symptoms – including depression, fatigue, anxiety, hair loss, facial hair growth and low sex drive – are caused by an incorrect balance of hormones in the body. bHRT can be an effective, natural alternative.

Sexual Dysfunction Treatment Options

Many women will experience sexual dysfunction, usually because of hormone imbalance or a physical condition such as arthritis, surgery, pain or neurological problems. Untreated anxiety, depression or stress can also affect a woman's sexual health. Sexual dysfunction can often be successfully treated with bHRT – a safe, natural alternative to help a woman regain the correct balance of hormones in her body.

Please visit or call us if you have any questions or would like additional information about our pharmacy and our compounding services.

We look forward to serving your specialty pharmacy needs.
